## THE 16TH ISBR SYMPOSIUM *"Advancing science in support of sustainable bio-innovation"*

### News Update May 2023

We are excited that so many people have joined us for ISBR 2023 in St Louis for this exciting symposium after four long years of pandemic-imposed absence. For those lucky enough to be in St Louis, there is still time to be inspired by the diverse and interesting scientific program and meet up with old and new colleagues from around the world.

Stay in touch with all the latest from the symposium by following us on Twitter (@ISBRSymposium) and LinkedIn.

## ISBR 2023 photo competition

Thanks for the many photographs submitted for the Photo Competition. With so much to choose from, it wasn't easy to come to a decision!

**1<sup>st</sup> Place:** *Coexistence* by Robert Chequer © 2023

**2<sup>nd</sup> Place:** *Interview by Fahadul Alam © 2023*

**3rd Place**

*Farmer taking GMO Bt brinjal for sale in the local market by Arif Hossain © 2023*

*Climate Smart Transgenic Cowpea by Abraham Isah © 2023*

**ISBR 2025**

We are excited to announce that the beautiful city of Ghent, Belgium will host the next ISBR Symposium in 2025! We have already started working with Marc Heijde and his team at VIB – International Plant Biotechnology Outreach to bring it to you. Stay tuned for further details about the symposium and become involved to help us ensure that it includes what you would like to see on the program.
